

Ian Alloway

Applied AI Engineer | Data Scientist | Evaluation-Driven Software and Agent App Builder

Fairmont, WV (Remote-Friendly) | 727-470-8666 | ian@allowayllc.com | ianalloway.xyz | github.com/ianalloway | linkedin.com/in/ianit | allowayai.substack.com

SUMMARY

Applied AI engineer and data scientist building evaluation-driven software, agent-developed apps, and analytics products. Contract AI evaluator via Handshake AI, including OpenAI Project Sunflower; founder of Alloway LLC. Accelerated B.S./M.S. pathway at USF: B.S. Information Science (May 2026, GPA 3.5, Magna Cum Laude); M.S. Artificial Intelligence (Expected December 2027, in progress). Strongest proof in LLM evaluation, blockchain analytics, cybersecurity data science, and decision-support systems built with Python, SQL, TypeScript, and FastAPI.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, R, Bash

AI / ML: Scikit-learn, XGBoost, PyTorch, TensorFlow, NLP, LLM-as-judge audits, prompt-injection testing, model evaluation, calibration, forecasting

Software / Data: FastAPI, React, Node.js, PostgreSQL, SQLite, Docker, GitHub Actions, Tableau, Power BI, Pandas, NumPy

Focus Areas: Agent-developed apps, data auditing, developer tooling, predictive analytics, fraud detection, decision-support systems

EXPERIENCE

Contract AI Evaluator

June 2026 - Present

Handshake AI

Remote

AI Trainer — Software Engineering / Coding

- Evaluate and score high volumes of frontier LLM responses on multi-turn software-engineering and coding tasks for quality, helpfulness, and communication.
- Apply structured rubrics (1–7 scale) across helpfulness, technical clarity, tone, response structure, and user collaboration.
- Author detailed score rationales and comparative preference evaluations across multiple candidate responses to complex programming prompts.
- Maintain high inter-rater agreement after passing rigorous calibration screening; contribute production human-feedback data that improves AI coding assistants.

Member of Technical Staff — OpenAI, Project Sunflower

- Evaluate high volumes of agent-built software and ChatGPT app development on Project Sunflower across engineering practices, logic, aesthetics, design taste, and overall product quality.
- Score Codex coding-agent completions on communication quality, tone, voice, and personality, including preambles, structure, and collaboration style, to improve how models interact with users.
- Apply rubric-based review to assess code quality, UX gaps, and failure modes in autonomously generated applications.
- Deliver detailed written feedback and comparative evaluations to improve model performance on real-world software development and app-building workflows.

Founder & Data Consultant

July 2023 - Present

Alloway LLC

Morgantown, WV

- Deliver applied ML, analytics, and automation solutions for sports, fintech, and business operations clients.
- Built ML-driven decision tools and dashboards that improved client operational efficiency by 40%.
- Lead engagements end to end from requirements through deployment and client handoff.

- Built data science deliverables across cybersecurity and hospitality analytics use cases.
- Developed predictive modeling workflows and analytics prototypes for applied research projects.

Senior Auditor

Omniichain

Oct 2024 - Dec 2025

Remote

- Analyzed multi-chain blockchain data across Ethereum, Solana, and Polkadot to improve omnichain monitoring.
- Implemented AI-powered anomaly detection and cross-chain analytics tooling; reduced fraud incidents by 30%.
- Partnered with engineering teams to integrate analytics into production workflows and optimize cross-chain performance.

SELECTED PROJECTS

juryrig | Python
Zero-dependency toolkit for auditing LLM-as-judge pipelines across position bias, verbosity bias, prompt-injection susceptibility, self-consistency, judge panels, and calibration scoring. <https://github.com/ianalloway/juryrig>

SOLVENT | Python, Stripe, Nemotron
Self-funding analyst agent that sells research briefs, collects Stripe payments, provisions its own compute and data spend under margin guardrails, and tracks P&L via a treasury dashboard. <https://github.com/ianalloway/solvent-agent>

ian-web-forge | React, TypeScript
Recruiter-facing portfolio site and public product surface for project proof, writing, resume distribution, and case studies. <https://github.com/ianalloway/ian-web-forge>

repo-health | Python, CLI
Repository-quality scoring tool for README quality, CI, licensing, staleness, and maintenance signals. <https://github.com/ianalloway/repo-health>

AI Advantage Sports | aiadvantagesports.com | React, Python, XGBoost
Model-backed product combining predictions, sizing logic, and live workflow design in a public-facing app. <https://aiadvantagesports.com>

OPEN SOURCE AND WRITING

OpenClaw: Contributor to the OpenClaw AI agent framework, including bug fixes, skill-system improvements, and published agent skills on ClawHub.

Alloway AI: Public writing on applied AI, model behavior, and evaluation-focused software at <https://allowayai.substack.com>.

EDUCATION

M.S. Artificial Intelligence | University of South Florida | August 2026 | Accelerated B.S./M.S. pathway

B.S. Information Science | University of South Florida | August 2024 – May 2026 | GPA 3.5, Magna Cum Laude
