Summary

ML Engineer and Data Scientist building production ML systems, model evaluation workflows, and analytics products. Technical Staff at OpenAI evaluating agent-built software and app development quality. Founder of Alloway LLC, with work across applied ML, blockchain analytics, cybersecurity data science, and decision-support systems. B.S. in Information Science, USF (May 2026, Magna Cum Laude, 3.5 GPA); M.S. in Artificial Intelligence, USF (August 2026).

Technical Skills

Languages:	Python, SQL, TypeScript, JavaScript, R, Bash
ML / AI:	Scikit-learn, XGBoost, PyTorch, TensorFlow, NLP, model & agent evaluation, rubric-based code review, calibration, forecasting, computer vision
Data / Analytics:	Pandas, NumPy, Tableau, Power BI, statistical analysis, experimentation, dashboarding
Backend / Infra:	FastAPI, React, Node.js, PostgreSQL, SQLite, Redis, Docker, Git, GitHub Actions, AWS
Domain Experience:	Sports analytics, blockchain analytics, fraud detection, decision-support systems

Experience

Technical Staff <i>OpenAI</i>	June 2026 – Present Remote
• Evaluate ChatGPT app development and agent-built software across engineering practices, logic, aesthetics, design taste, and overall product quality • Apply rubric-based review to assess code quality, UX gaps, and failure modes in autonomously generated applications • Deliver detailed written feedback to improve model performance on real-world software development and app-building workflows	
Founder & Data Consultant <i>Alloway LLC</i>	July 2023 – Present Morgantown, WV
• Deliver applied ML, analytics, and automation solutions for sports, fintech, and business operations clients • Built ML-driven decision tools and dashboards that improved client operational efficiency by 40% • Lead engagements end to end: requirements, implementation, deployment, and client handoff	
Data Science Contractor <i>West Virginia University</i>	Dec 2024 – Dec 2025 Morgantown, WV
• Built data science deliverables across cybersecurity and hospitality analytics use cases • Developed predictive modeling workflows and analytics prototypes for applied research projects	
Senior Auditor <i>Omniichain</i>	Oct 2024 – Dec 2025 Remote
• Analyzed multi-chain blockchain data across Ethereum, Solana, and Polkadot to improve omnichain monitoring • Implemented AI-powered anomaly detection and cross-chain analytics tooling; reduced fraud incidents by 30% • Partnered with engineering teams to integrate analytics into production workflows and optimize cross-chain performance	

Projects

- [juryrig](#) — Toolkit for auditing LLM-as-judge pipelines: position bias, prompt-injection susceptibility, calibration, and judge panels. *(Python)*
- [AI Advantage Sports](#) — Sports analytics platform with ML predictions, Kelly-based bet sizing, and live NBA workflows. *(React, Python, XGBoost)*
- [NBA CLV Dashboard](#) — FastAPI dashboard for calibration, rolling accuracy, and CLV-style evaluation reporting. *(Python, FastAPI)*
- [Repo Health](#) — CLI scoring repository quality across README, CI, licensing, and maintenance signals. *(Python, CLI)*

Open Source

- [OpenClaw](#) — Contributor to the OpenClaw AI agent framework, including bug fixes, skill-system improvements, and published agent skills on [ClawHub](#).

Education

M.S. Artificial Intelligence <i>University of South Florida</i>	Aug 2026
B.S. Information Science <i>University of South Florida</i> <i>GPA 3.5, Magna Cum Laude</i>	Aug 2024 – May 2026
Hillsborough Community College	Aug 2022 – July 2024

Certifications

Deep Learning Specialization (Andrew Ng, Coursera) | Machine Learning Engineering (Google Cloud) | AWS Certified Cloud Practitioner | Blockchain Fundamentals (UC Berkeley) | Oracle Database SQL Certified Associate | Tableau Desktop Certified Professional
