

Ian Alloway

Applied AI Engineer | Data Scientist | Evaluation-Driven Software and Agent App Builder

Fairmont, WV (Remote-Friendly) | 727-470-8666 | ian@allowayllc.com | ianalloway.xyz | github.com/ianalloway | linkedin.com/in/ianit | allowayai.substack.com

SUMMARY

Applied AI engineer and data scientist building evaluation-driven software, agent-developed apps, and analytics products. Completed a B.S. in Information Science at the University of South Florida in May 2026 and currently pursuing an M.S. in Artificial Intelligence at USF. Strongest public proof in LLM evaluation, AI auditing, developer tooling, dashboards, and decision-support systems built with Python, SQL, TypeScript, FastAPI, and R.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, R, Bash

AI / ML: Scikit-learn, XGBoost, PyTorch, TensorFlow, NLP, LLM-as-judge audits, prompt-injection testing, model evaluation, calibration, forecasting

Software / Data: FastAPI, React, Node.js, PostgreSQL, SQLite, Docker, GitHub Actions, Tableau, Power BI, Pandas, NumPy

Focus Areas: Agent-developed apps, data auditing, developer tooling, predictive analytics, fraud detection, decision-support systems

EXPERIENCE

Founder & Data Consultant

July 2023 - Present

Alloway LLC

Morgantown, WV

- Deliver applied AI, analytics, and automation projects across sports, fintech, and business operations use cases.
- Ship decision-support tools, dashboards, and reporting workflows from requirements through deployment and handoff.
- Developed ML-driven and data-quality workflows that improved client operational efficiency by 40%.

Data Auditor / AI Engineer

Jan 2020 - Dec 2024

Omniichain

Remote

- Extracted, normalized, and analyzed blockchain data across Ethereum, Solana, and Polkadot for risk and fraud monitoring.
- Built anomaly-detection tooling and audit workflows that reduced fraud incidents by 30%.
- Created dashboards and SQL-based monitoring for token flow, market movement, and transactional risk.

Operations Leadership

2018 - 2023

Hilton Hotels; IT Parts and Spares Ltd.

FL

- Led operational improvement, vendor management, budgeting, procurement, and process-visibility work in customer-facing environments.
- Built the execution discipline and reporting habits I still bring to technical delivery.

SELECTED PROJECTS

juryrig | Python

Zero-dependency toolkit for auditing LLM-as-judge pipelines across position bias, verbosity bias, prompt-injection susceptibility, self-consistency, judge panels, and calibration scoring. <https://github.com/ianalloway/juryrig>

ian-web-forge | React, TypeScript

Recruiter-facing portfolio site and public product surface for project proof, writing, resume distribution, and case studies. <https://github.com/ianalloway/ian-web-forge>

repo-health | Python, CLI

Repository-quality scoring tool for README quality, CI, licensing, staleness, and maintenance signals.

<https://github.com/ianalloway/repo-health>

AI Advantage Sports | React, Python, XGBoost

Model-backed product combining predictions, sizing logic, and live workflow design in a public-facing app.

<https://github.com/ianalloway/ai-advantage>

OPEN SOURCE AND WRITING

OpenClaw: Contributor to the OpenClaw AI agent framework, including bug fixes, skill-system improvements, and published agent skills on ClawHub.

Alloway AI: Public writing on applied AI, model behavior, and evaluation-focused software at

<https://allowayai.substack.com>.

EDUCATION

M.S. Artificial Intelligence | University of South Florida | In Progress

B.S. Information Science | University of South Florida | Completed May 2026
